

**Table 2.** Case studies

Case study	Development or disaster relief?	Risk	Index	Target user	Year first implemented	No. of beneficiaries in 2008 (or most recent available figures)	Notes
<b>Case study section I, starts on page 13</b>							
Unlocking development potential in Malawi	Development	Drought	Rainfall	Tobacco farmers	2005–06	2500	Began targeting groundnut (and maize) farmers, but due to supply chain issues changed to support the stronger tobacco system
Disaster insurance in Ethiopia	Disaster relief	Drought	Rainfall	WFP operations in Ethiopia	2006	316,000 (2006)	No payout in 2006. Policy not renewed in following years. US\$25 million contingency financing contract paid out in 2008. Scale up to US\$250 million planned for 2010
<b>Case study section II, starts on page 42</b>							
National-level drought risk management in Malawi	Disaster relief	Drought	Rainfall (linked to maize production)	Government of Malawi	2008		Currently in first trial year
A farmer-centric approach in Ethiopia	Development	Drought	Rainfall	Teff farmers in Adi Ha	Under development		
Insurance for contract farming in India	Development	Late blight disease	Temperature and humidity	Potato farmers under contract to PepsiCo	2007	4575	
Disaster relief in Mexico	Disaster relief	Natural disasters impacting smallholder farmers, primarily drought and flood	Rainfall	State governments	2002	800,000	
Catastrophe risk insurance in the Caribbean	Disaster relief	Hurricanes and earthquakes	Wind speed and shaking	Caribbean country governments	2007	16 countries	
Insuring development goals in the Millennium Villages Project	Disaster relief	Drought	Combination of rainfall and vegetation remote sensing	Inhabitants of villages in the MVP	2007		Experimental product transacted in three MVP villages in Kenya, Ethiopia and Mali in 2007. Not repeated in 2008
